## Sentence Parsing

1 The quiet man screamed for the first time in his life, but nobody was around to hear him.

the first in  
life  
his  
but  
around  
to hear  
him

4. ~~Screening~~ (1)

0) The quiet man (who screened)

1-Talk for the first time in his life (Significance of the screening)

Was

0-He in her hand (what something existing to do)

1) nobody (look of someone to exist)

2) around (what they wake)

hear)

0) nobody (look of a person to hear)

1) him (what were they looking)

5. Phrasal structures is best for forming substructure from, but there is as much context

IRL parsing is good for word/phrasal structure

but isn't as good for <sup>complex</sup> substructures & cohesion

Dependency parse can be seen as a middle ground, good for significance & substructures, but lacking in cohesion.
